Figures came from ADF&G, Alaska Dept. of Labor and Kenai Borough. OBSERVATIONS
 1. The great commercial fishing years (1992, 1988 and 1987) had high unemployment rates
 and the poor years (2001, 2000 and 1998) had low rates. 2. Neither great nor poor commercial
 fishing years had any significant impact on taxable sales in the Kenai Borough.
